

Sample Questions for Internal Examination:

1. Definitions of AE, SAE, ADR, blinding, placebo, clinical research, clinical trial, placebo, PMS, phase 1,2,3.
2. Pathway of clinical research from drug discovery, preclinical and phase 1-4
3. Difference between Clinical research and clinical practice
4. Tuskegee trials, thalidomide tragedy, belmont report
5. Randomized clinical trial, cross over trial, run in design, parallel design.

Sample Questions for External Examination:

1. Definitions of AE, SAE, ADR, blinding, placebo, clinical research, clinical trial, placebo, PMS, phase 1,2,3.
2. Pathway of clinical research from drug discovery, preclinical and phase 1-4
3. Difference between Clinical research and clinical practice
4. Tuskegee trials, thalidomide tragedy, belmont report
5. Randomized clinical trial, cross over trial, run in design, parallel design.
6. What is the purpose, requirements, and benefits of a Phase I and Phase III in clinical trials?
7. Explain in brief GCP and Schedule Y. What is the difference between ICH- GCP and Schedule Y.
8. State the difference between Clinical research and Clinical practice
9. Describe a parallel, cross over, run-in, factorial, randomized clinical trial design with an example.
10. Explain in brief the drug discovery pathway w.r.t. to target identification & validation, HIT discovery process and Hit to Lead in clinical research
11. What is meant by IND and ANDA? State the approval pathways for the same.
12. What is meant by PMS? What is the difference between PMS & PV?
13. Discuss the significance of the Tuskegee trials, Thalidomide in the history of Clinical Research.
14. What is meant by NDA? What is the purpose of the same?
15. What is the purpose and the importance of SAFETY and Toxicology parameters in preclinical studies?
16. Define Clinical research and in brief state the pathway to FIH trials.
17. Discuss the development process & designing of an effective CRF.
18. Describe the decentralized procedure in EMA.
19. Discuss Discrepancy Management
20. What is the USFDA and explain its role in clinical trial regulations.
21. Discuss in brief the CDM process with help of a flow chart.
22. Write a short note on Phase II of the clinical trial.
23. What is meant by Informed consent? What is its significance in CT?
24. Difference between SMO and CRO.
25. State 6 principles of the ICH-GCP, ICMR.
26. What is an IB? How does it facilitate the rationale of the protocol w.r.t to CT?

27. Discuss SAE reconciliation
28. What is Schedule Y? Discuss the mandates for the rules 122DA, 122DAB, 122DAA.
29. Discuss EDC w.r.t clinical trial data.
30. Define a Sponsor, Principal investigator, CRA and mention 6 responsibilities.
31. Define the following ADR, AE, SAE, Clinical research, trial, blinding, placebo.
32. What is meant by blinding, placebo and discuss its purpose in clinical trials.
33. Discuss the gold standard of clinical trial designs aka RCT.
34. Write a short note on Phase III of clinical trials.
35. Explain the significance of the Thalidomide tragedy and its contribution to the field of CR.
36. What is meant by blinding and placebo? Discuss the purpose of it w.r.t to an effective clinical trial design.
37. Discuss the importance of assessment of safety w.r.t ADME in Phase I clinical trials.
38. What is recorded in a TMF and by the DSMB.
39. What is meant by CDM?
40. What is meant by PSUR
41. SMO, CRO
42. What is medical coding, explain with examples of CPT and ICD codes.
43. CRF design, purpose and eCRF significance.
44. What is meant by bias, how does it challenge the design of clinical trials?
45. Short note on Drugs&Cosmetics Act, Schedule Y, ICH GCP.
