

Question Bank

Drug designing & Discovery

1. Describe i) lead discovery and ii) lead optimization and comment How is lead optimization carried Out suitable examples.
2. What is ligand-based drug discovery? Explain the salient features of ligand-based drug discovery with examples.
3. overview of Drug discovery process. And comment on structure-based drug designing with suitable examples.
4. Explain any pharmacological model for drug efficacy studies.
5. Explain sources of drugs in details
6. Explain the screening technology in drug discovery.
7. Comment on various regulatory affairs which take place in the drug discovery process.
8. Enlist the stages involved in Drug Discovery and Development. Elaborate any one stage with suitable examples.
9. What are the components of Pharmacokinetics part of Drug Action? Discuss the salient features of any one of these with appropriate examples.
10. What are the emerging technologies in Drug Discovery Discuss the same.
11. Hurdles in the drug discovery process.
12. Explain the properties of drugs and various sources of drugs.
13. What are Prodrugs and Bioesters. Explain
14. Discuss the finer aspects of any one of the various pharmacological models for the evaluation of drug efficacy and potency, with suitable example(s).
