

Question Bank

Health Informatics (MP 3)

1. What is Health Informatics? Explain in detail along with its key features
2. Difference between Health Informatics & Digital Informatics
3. Explain with suitable example Electronic Health Records (EHR) and how they differ from Electronic Medical Records (EMR).
4. What are some barriers to adopting health informatics in hospitals? Discuss
5. Describe the Health Level Seven (HL7) & Hitech standard and its significance.
6. Elaborate on data privacy and security impact health informatics?
7. What are FHIR (Fast Healthcare Interoperability Resources) standards?
8. What are the different types of health data breaches ?
9. What is the role of Artificial Intelligence (AI) & Big data in health informatics?
10. What is telemedicine , and how has it transformed healthcare
11. Define real-world evidence (RWE) in healthcare research.
12. How does an EHR improve patient safety and quality of care?
13. Explain FHIR (Fast Healthcare Interoperability Resources) and its role in EHRs
14. Describe the HIPAA (Health Insurance Portability and Accountability Act) and its impact on EHR security
15. Role of AI & ML in Health Informatics
16. Real-World Applications of Big Data & Predictive Analytics
17. What is Predictive Analytics in Healthcare? Explain
18. Key Components of Healthcare Data
19. What is Health Information Exchange (HIE)
20. Standards Enabling Interoperability & HIE
21. Explain the Interoperability and Health Information Exchange (HIE) in detail.
22. Discuss the HITECH Act (2009) in detail
23. EHR Standards and Regulations (HIPAA, HITECH Act)
24. Describe the Components and Architecture of HIS
25. Various System Implementation & Adoption Challenges faced during the HIS
26. What is the role of cloud computing in modern EHR solutions?
